III. Do Not Track

Do Not Track is a feature of modern browsers that allows you to let a website know you would like to opt-out of third-party tracking. It does this by transmitting a Do Not Track HTTP header every time your data is requested from the website. However, not all websites understand the Do Not Track signal because there is not yet a common understanding of how to interpret the Do Not Track signal. Because of this lack of clarity, our

website does not respond to the browser Do Not Track signal. Thus, most cookies will continue to be stored until you choose to delete them. If you want to enable Do Not Track in the popular browsers, please follow these links:
